Search, download, and stream the best Free Mp3 Music â Free Mp3 Songs And Music Videos â Free Mp3 Songs, Free Mp3. Kumar sanu mp3 songs free download zip can help you with PC. you just need to install a program such as WinRAR or 7-Zip to open.Q: Cannot instantiate class for dependency of type [javax.jdo.JDODataSource] from [javax.servlet.http.HttpServlet] I am trying to extend hibernate project in spring MVC. I want to do all things that I can do in hibernate project. It used to work just fine before adding spring framework, but when I was trying to compile it with it, it started giving me this error: Cannot instantiate class javax.jdo.JDODataSource from [javax.servlet.http.HttpServlet] for dependency injection and it is giving me exception as shown above. any help will be really appreciated, I am new to java and not to spring. A: You haven't mentioned the version you are using, but I think you are using an older version of Hibernate that does not include the servlet spec. If this is the case, consider upgrading to a more recent version that supports it. Q: Android: How to get two LinearLayouts to expand to fill their parent? I am trying to create a LinearLayout with 3 child LinearLayouts of equal width. The 3 child LinearLayouts must stretch the width of their parent while the space in between the 3 child LinearLayouts should be transparent, allowing the background to be seen. I can get this to work by setting the layout_weight property for each of the 3 child LinearLayouts. However, I would like to know how to accomplish the same thing using a simple RelativeLayout as the root element, but without having to set the layout_weight property for the child LinearLayouts.
