System Requirements:

For a new computer or for an upgrade to an existing computer, you need to have an Intel, AMD or Nvidia graphics card that supports DirectX 12. For best performance, you can run the game at the highest graphics settings, although it should be usable at much lower settings. All DX12 graphics cards are recommended, including AMD's R9 290 and later graphics cards and Nvidia's GTX 970 and later graphics cards. It is also recommended to run the game on Windows 10. We recommend you have at least 8GB of RAM for the game, and Windows 7
