Great game but did it in 9 hours.. This game has some flaws like no caution replay (even though you can see SOME wrecks) and pretty... awful physics, but it's an arcade game. The driving, the AI, and even the rivalry system have greatly improved over the last year and you could tell they really tried to improve the game! There was a problem when I first started with the Thrustmaster T80 I have, but there's a simple fix to that: to reset all of your settings and manually click or choose your preferences under options and controls. Here's something though, I didn't play this for 33 hours, it was just open and not in use for almost half the time lol.. A well done wave shooter, well priced. Graphics look nice - the sand worms could use a little work visually but the standing monsters are great and scared me for sure. The companion who helps would be better with an actual voice I think... the guns responsive and aim is natural.. Probably the most accurate portrayal of Australia I have ever witnessed. When this game came out there haven't been that many good shmups on the steam market. But as it is now I simply recommend to save your money for better titles.. What can I say that has not already been said about the intriguing party game that is The Yawhg? I have played this game with around 30 different people, and have seen something new every time. I find that it is best to explain nothing regarding the "right" way to play the game, and let my friends figure it out on their own.

It isn't a game that will have your group erupting in fits of laughter, and it can only be played so many times in a single session, but it is ideal for those late nights spent together in a dimly lit room. You and three of your closest friends, sitting together on a comfortable couch, and listening to the soft music acts feels so right after partaking in higher-energy activities earlier in the night.

Overall, I recommend this game. \$10 is a solid price point for it, and the memories which remain are some the fondest I have of the times when my friends and I were all together.. The steam store listed it as local multiplayer but that is a lie. Thats the only reason I bought this game.. One of the best Vive Games out there yet. Tons of fun and replayability. Just get it! Seriously you won't be dissapointed!. Aside from a few ecchi dating scenes, this DLC doesn't add that much. If you really liked Time Tenshi 2 then go ahead, but don't expect much in terms of dramatic changes. It's a nice addition for people who are playing the game for the first time, but for people who already own the game and are buying this DLC version I'm not sure if it's worth it as much, and if you're knew to the game you should just buy the regular Special Edition. But I'm assuming you're here because you liked TT2, so you might as well try it if you want more conveniently covered boobs.. Really fun and addictive as hell... grate game!!! i really enjoy it!!!

The game has yet nothing to offer. No Content.

It's a multiplayer only game without players...

Maximum price in my opinion: 0,10\20ac. biggest worth of all time who would not want an overpriced loli who calls you daddy. This is a fun witty adventure that comfortably challenges your brain.. Not great. The game holds together, for the most part, but the plot is a bit awful. Without spoilers, let us just say that the end is deeply unsatisfying, and that, throughout the game, there are points where one's choices don't really seem to matter- One can make a decision, only to have it immediately undone by a theoretically allied NPC with a different agenda. While realistic, in a game centered around choices, it's generally more ideal to have some counter to this, or to be able to influence one's theoretical allies more significantly. I cannot say I recommend this game for six dollars, or even four. The writing was good, but the plot was deeply unsatisfying.. If you loved the boys, you will love this Drama CD just as much.

The VAs did such a great job, I fell in love with the boys all over again. Now I carry them along on my MP3 all the time. There were also interviews of the VAs and some Bloopers, which made me laugh very hard.

The price seems more than fair for me, too, considering the first VN is free!. you guys srsly need to work on your weapon types and the core shooter flow. there is no gameplay around regening your HP and so far the weapon types are quite dull. the flow of the game just gets a bit obstructed by the fact that the only way to regen energy is to kill and there is no way to regen hp (at the start atleast).

also your default controls are not so comfortable (I didnt use dash at all since it is on middle mouse button - how do you expect me to fire from both weapons and press the 2nd mouse button?) Yeah - i could change my weapon controls - but having bad default weapon controls is not a great idea.

also you should work on your aiming controls - you have a limited distance you can draw your cursor and that fells really off and so far the default mouse sensitivity feels RLY uncomfortable, add that to the fact that the camera rolls around like mad (yeah it looks funky at start, but later starts to get annoying)

the llama theme and the pun density setting rly made my day. at first it was cringy af, but after 10 minutes i got hooked.

visuals are nice. not the problem spot of the game.

if you want any detailed tips on twin-stick top-down game design you can pm me. i happened to work on a twin stick shooter myself atm and could share some insight.. A great preview to a game I will definitely be getting on launch. It only takes 15minutes to complete, but it is very well designed with great graphics intuitive puzzles.
